Environmental Social Governance

Working towards a sustainable future

Toshiba is continuously working together to deliver sustainable and responsible business practices. Through our environmentally conscious products and carbon offsetting scheme, we hope to also help you reach your CSR goals and further enhance your commitment to the future of the planet.

Carbon Zero

With the help of carbon offsetting experts GreenFleet, our Carbon Zero scheme is able to offset the CO2 emissions of our products. This allows you to invest in local reforestation projects that save or absorb an equivalent amount of Greenhouse gas produced during the lifetime of your print device.

Circular Economy

At Toshiba, the prioritised use of sustainable resources offers many opportunities for manufacturing innovations, avoidance, reuse of materials and recycling.

- The number of materials used is kept to a minimum
- Materials are recyclable and easily removed
- Products are designed and produced efficiently
- Our service covers the entire lifecycle
- We avoid and recycle packaging waste
- Print devices are refurbished to maximise the usable lifespan of the product

**TOGETHER
INFORMATION**

We're not just here to talk, we're here to make things happen together, we can limit our impact on the planet through more secure, efficient and environmentally-friendly printing practices.

PrintReleaf

With every page we print, Toshiba partners with PrintReleaf to reforest our world, ensuring that the paper used is sustainably replaced. You can choose to join this program to offset your paper usage. So that as you print, trees are planted, helping to restore forests in areas that need it most.

eCycle Solutions

As a fully compliant administrator of the National Television and Computer Recycling Scheme, Ecycle Solutions offer a true 97% national coverage for ewaste. This includes "end of life" device collection and disposal as well as disposal of Expanded Polystyrene (EPS).

Secure Print Release

e-BRIDGE Global Print helps organisations manage their print environment efficiently. By securely controlling print usage, Global Print ensures that every print job is necessary, reducing paper waste and conserving resources.

Reduce, reuse and recycle

We believe in the importance of reducing our impact on the environment by reducing the resources we use and ensuring they are reusable or recyclable, to be repurposed for decades to come. For this reason Toshiba is proud of its long association with Close the Loop for the recycling of used toner cartridges.

Sustainable Development Goals

The UN has 17 measurable Sustainable Development Goals (SDGs), which Toshiba is working hard to support and currently contributing towards 15 of them. Our own CSR policies are aligned to these principles, so that we can do our bit in helping to create a better future for us all together.

Compliance and certification

Adhering to local and International standards and regulations is essential for maintaining a responsible approach to sustainability. Toshiba meets and exceeds the standards set by many directives. Including:

- Waste Electrical and Electronic Equipment (WEEE)
- Restriction of the use of certain Hazardous Substances (RoHS)
- Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)

We have earned the following ISO accreditations:

- ISO 9001 – International quality management system standard
- ISO 14001 – International environmental management system standard
- ISO 45001 – International standard for occupational health and safety
- ISO 27001 – Information Security Management Systems

Toshiba products comply with the highest environmental standards, so you can rest assured knowing that you're partnering with an organisation that has earned its stripes.

About Toshiba Australia

Toshiba (Australia) Pty Limited is part of the globally operating Toshiba Tec Corporation, active in various high-tech industrial sectors.

Toshiba is a leading provider of information technology, operating across multiple industries—ranging from retail, education and business services to hospitality and manufacturing. With headquarters in Japan and over 80 subsidiaries worldwide, Toshiba Tec Corporation helps organisations transform the way they create, record, share, manage and display information.
