NEW Version 3

e-BRIDGE Open Platform Connector for Microsoft® SharePoint®

Toshiba's e-BRIDGE Open Platform Connector for Microsoft® SharePoint® offers high levels of integration with e-STUDIO Multi-Functional Devices (MFD).

Now users can streamline processes to improve office efficiency and productivity, in effect reducing your organisations bottom line.

- MFD scan interface integrated with SharePoint "On Premises or Cloud"
- Restricted access to user sites and lists with login security
- Thumbnail preview with onscreen swipe, zoom and edit*
- Simplified scanning with predefined locations
- Location history minimises scan keystrokes for multiple jobs
- Enter metadata for granular indexing in SharePoint
- Convert scans instantly to up to 24 different file formats when integrated through Toshiba's e-BRIDGE Re-Rite® option

    - MS\Word, Excel, Powerpoint)

    - eBOOK for mobility (ePUB, FB2)

    - PDF/A for long term archiving

    - PDF with document level encryption and security

- Scan multiple jobs in a single batch with barcode separation using the optional e-BRIDGE Re-Rite application

Advanced User Interface

*   Standard user interface does not support wipe and zoom functions
